

Bayside Dysphagia Diagnostics

MOBILE FEES · CAPE COD & SOUTH SHORE, MASSACHUSETTS

What Is FEES?

FEES (Fiberoptic Endoscopic Evaluation of Swallowing) is a cost-effective and convenient tool for assessing swallowing disorders that provides direct visualization of the swallow in the patient's natural eating environment. A thin, flexible endoscope is passed through the nose for a real-time view of the pharynx and larynx while the resident eats and drinks actual food and liquid textures — not a barium-coated substitute. Results are available immediately, and the procedure is generally well-tolerated.

- **No transport** — done in the resident's room, usually within 1–3 days of referral
- **No radiation** — safe to repeat as often as clinically needed
- **Real diet** — evaluates the food and liquids the resident actually eats

Why Bayside Dysphagia Diagnostics?

- **Founder-led care** — every study performed by a 25+ year dysphagia specialist, not a rotating contractor pool
- **FEES-specific expertise** — an instructor of FEES training courses with 20+ years of performing FEES in various medical settings
- **True partnership** — providing patient, family and staff education as well as direct collaboration with your facility SLP on care planning
- **Local & responsive** — dedicated coverage across Cape Cod and the South Shore, with fast scheduling

The Financial & Patient Outcomes Case

~75%¹

Lower average cost than an off-site Modified Barium Swallow, once transport, radiology, and staff time are included.

\$14K–\$30K

Transfer cost avoidance for hospital readmissions related to aspiration pneumonia.

50–70%²

Of elderly patients with dysphagia silently aspirate — missed on a standard bedside swallow evaluation.

10–30%²

30-day mortality rate for nursing home residents who develop pneumonia, the leading cause of death in this population.

How to Order a Study

01

Submit the Order

Submit a consultation or physician order form via secure portal.

02

Schedule Evaluation

Clinician coordinates with facility staff to confirm patient readiness, consent and schedules evaluation.

03

Results Debrief

Clinician collaborates with facility SLP on recommendations and treatment planning.

About Us

Melanie Reynolds, MS, CCC-SLP

FOUNDER · SPEECH-LANGUAGE PATHOLOGIST

ASHA-certified with 25+ years across inpatient, outpatient, and acute hospital settings including Cape Cod Hospital, South Shore Hospital, Boston Medical Center, and Spaulding Rehabilitation Hospital. FEES instructor, BU Sargent College guest lecturer, and published researcher.
